INTERNSHIP

The Better Tomorrow, January 2025 - February 2025 [MERN STACK]

- Completed an intensive program on full-stack web applications , leveraging Mongo DB , Express , React , Node JS.

TECHVANCH , July 2025 [MODERN FULL STACK]

- Trained in modern full-stack applications using TypeScript, React.js, and Next.js.

PROJECTS

“MONOCULAR DEPTH ESTIMATION”: (TECH STACK : ML , IOT, NETWORKING , FRONTEND) 2025

I have built a fully automated rover that works on the main principle of depth prediction and trained it on DEPTH ANYTHING V2, which was quantized into a TRT model on the Jetson Orin Nano. It converts depth to pseudo-distance relative to the depth values. It has a web server interface streaming via SSH.

“VIDTUBE”: (TECH STACK : NODEJS , COOKIE-PARSER , MONGODB , CLOUDINARY) 2025

I built a scalable Node.js backend application, inspired by YouTube, utilizing MongoDB for storing video metadata and user data. Implemented cookie-based authentication for secure user sessions, enabling features like video uploading, commenting, liking, and subscription management, with a focus on performance and reliability.

“REAL-TIME EARTH LEAKAGE DETECTION”: (TECH STACK : MERN , SOCKETS , CHART JS , IOT) 2024

Enhanced a real-time earth leakage detection system using the MERN stack for dashboard and app integration, enabling instant alerts, precise location mapping, and efficient monitoring of grounding health via LoRa-based communication.

“ADVANCED POULTRY MANAGEMENT”: (TECH STACK : FRONTEND , IOT) 2023

I have developed a project to reduce ammonia accumulation in poultry. I came up with the solution of installing a sprinkler, which would spray citric acid on ammonia deposits, giving the byproduct ammonium citrate (natural fertilizer). For this, I have created a frontend that can be used by farmers and uses sensors to detect if the ammonia exceeds 25ppm.

“AUTOMATED STAIN DETECTION”: (TECH STACK : OPENCV , FRONTEND) 2023

Built a machine learning system with OpenCV and backend that detects stains on fabric using ROI, HSV color analysis and background thresholding, enhancing textile quality control and efficiency.

ACHIEVEMENTS

CATERPILLAR TECH CHALLENGE 2025 (FINALIST) 2025

CREATATHON'24 RUNNER 2024

ELECT-ERA'24 – 2ND PLACE (CASH PRICE 3000) 2024

PROJECT EXPO '24 -3RD PLACE 2024

PYTHON PROJECT'24 – 2ND PLACE 2024

FUTUREPRENEUR -3rd PLACE (CASH PRICE :3000) 2025

PROBLEM SOLVING LEETCODE ([Link](#)) : PROBLEMS SOLVED: 200+ | HIGHEST CONTEST RATING : 1571

CERTIFICATIONS

- DATA STRUCTURES AND ALGORITHM - UDEMY 2024
- C PROGRAMMING - UDEMY 2024
- PROGRAMMING IN JAVA – NPTEL 2024
- LINUX MODULES -UDEMY 2025
- COMPLETE WEBDEVELOPMENT on MERN , NEXT JS 2025

TECHNICAL SKILLS

LANGUAGES : C++, Java, JavaScript, TypeScript, HTML, CSS, SQL (Query Language)

TOOLS : VS Code, Git, GitHub, Arduino IDE, Canva, Ollama, msty

LIBRARIES AND FRAMEWORKS : React, Next.js, Express.js, Node.js, Tailwind CSS, Bootstrap, OpenCV, Redux, Zustand, Bun

DATABASES / BACKEND SERVICES : MySQL, MongoDB (NoSQL), Firebase, Appwrite

CORE CONCEPTS : Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Data Analysis & Algorithms, MERN Stack, Machine Learning (ML), Large Language Models (LLMs), Version Control
